## Hotdogs, sausages and bread

Hot dog stand, convenience store, or mobile equipment.  
We deliver the equipment for your business.

## Hot dog stand

A hot dog stand is usually equipped with cooking and frying equipment that can make the classic servings; grilled and cooked sausages, hot dogs, French hot dogs, bread, etc. we have the necessary equipment for your hot dog stand, and we can meet most equipment needs.

The sausage warmer is ideal for cooking of the classic sausages, served with bread and various accessories. The sausage warmer is available in several sizes and models, and both as countertop models and models that can be built into the countertop.

No matter what you choose to serve, you can get most of the FKI equipment in several sizes to fit the space in your hot dog stand.

A sausage grill is necessary equipment in the classic hot dog stand. It is a guarantee that customers get hot and crispy sausages, and the two heating zones makes it possible to grill the sausages on one zone and then keep them warm on the other zone.

## Hot dog stand

The conveyor toaster can heat many different types of bread, and it is especially good for hot dog buns and bread for French hot dogs. It is available in two sizes and with adjustable speed of the conveyor belt the bread is placed on while toasting.

## Convenience

When people are at the petrol station or the convenience store they are easily tempted by the good smells of hot food. You can benefit from this by selling food that is nicely presented and smells good in the store.

Customers are tempted to get something to eat when they are in the store anyway.

The sausage grill comes in many sizes and variations. If the sausage grill is built into the countertop it will improve the ergonomic work position, and at the same time it ensures a good presentation of the food products. The customers can see, how the sausages are heated.

Petrol stations and convenience stores account for a large share of fast food sales, and it is fast and easy for customers to buy a quick meal.

You can use a toaster to heat many types of bread, as well as making panini, toasts and heat sandwiches. It therefore meets multiple purposes and is practical in a convenience store or a small kitchen where space is limited.

## Convenience

A roller grill ensures even cooking of the sausages, and the sausages can be grilled without you having to check on and turn the sausages regularly. The sausages are turned automatically at a slow pace, and the food is presented nicely for the customers at the same time.

The conveyor toaster is available in several models and sizes, and it can easily solve many bread toasting tasks. The conveyor toaster is also very stable in operation and it has a low lifetime cost.

# Bike / mobile equipment

We can do many things. Whether it needs to be a large or small set-up does not mean the world to us. Our bike is a good example that we can do some different things out of the ordinary. The bike is easy to get around with and you can use it for events and festivals, where the food is where the customers are located instead of the other way around.

A sausage warmer that can be built into the countertop takes up very little space and fits perfectly in the interior of a “food bike”. The built-in models are available in several sizes and if a countertop models fits better in your decor we have this as well.

A heating drawer for bread is the optimal solution for the small mobile “hot dog stand”, where it can be difficult to bring along a bread toaster. In addition, the heating drawer uses a lot less power.

If you need a small or flexible set-up that is easy to transport, we can make a good solution for you.

A small sausage grill is easy to move around as it neither fills nor weighs much. This makes it ideal for mobile kitchens, a food preparation cart or a “food bike”. It is available in different sizes and models.
